

## Installing Recall on OSX 10.11+

Recommended installation procedure for OSX 10.11+ (El Capitan and later):

- Download the latest [Recall Software \(Mac\)](#) software
- Unzip the downloaded file
- Right-click the installer ".mpkg" file and select **Show Package Contents**
- Open the folder **Contents**, then open **Packages**
- Open the **Neve Recall.pkg** and follow on screen instruction to install the software

After installing Recall Software, install the OSX 64-bit driver ([download here](#))
